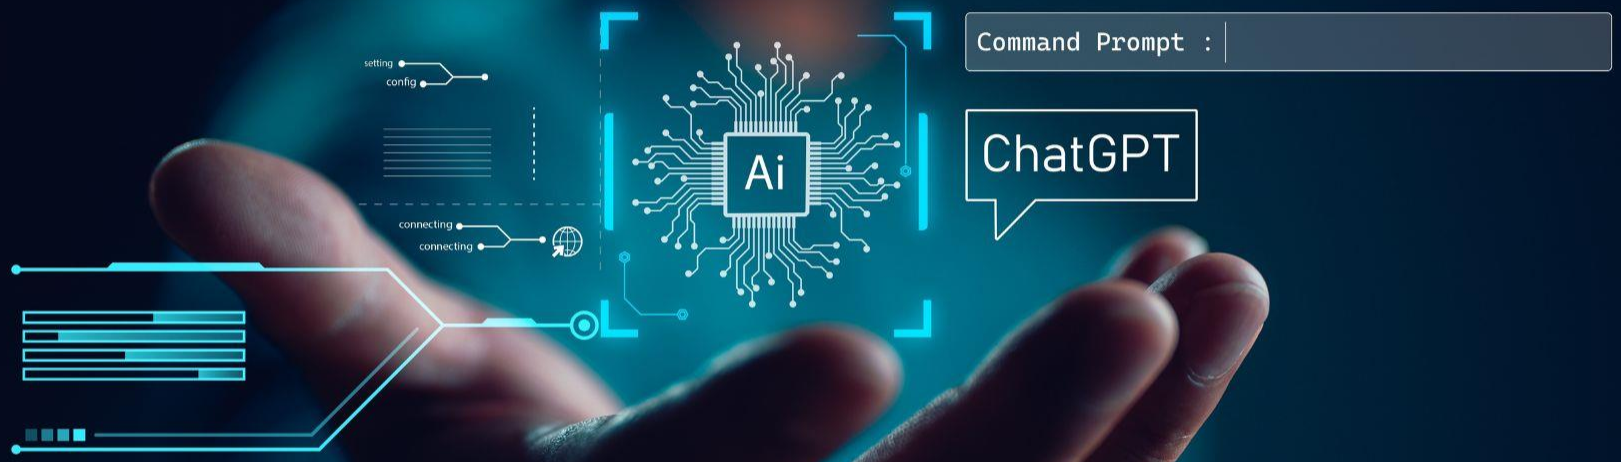
Google Trends Search Analysis on AI



Overview of global search interest across AI-related keywords

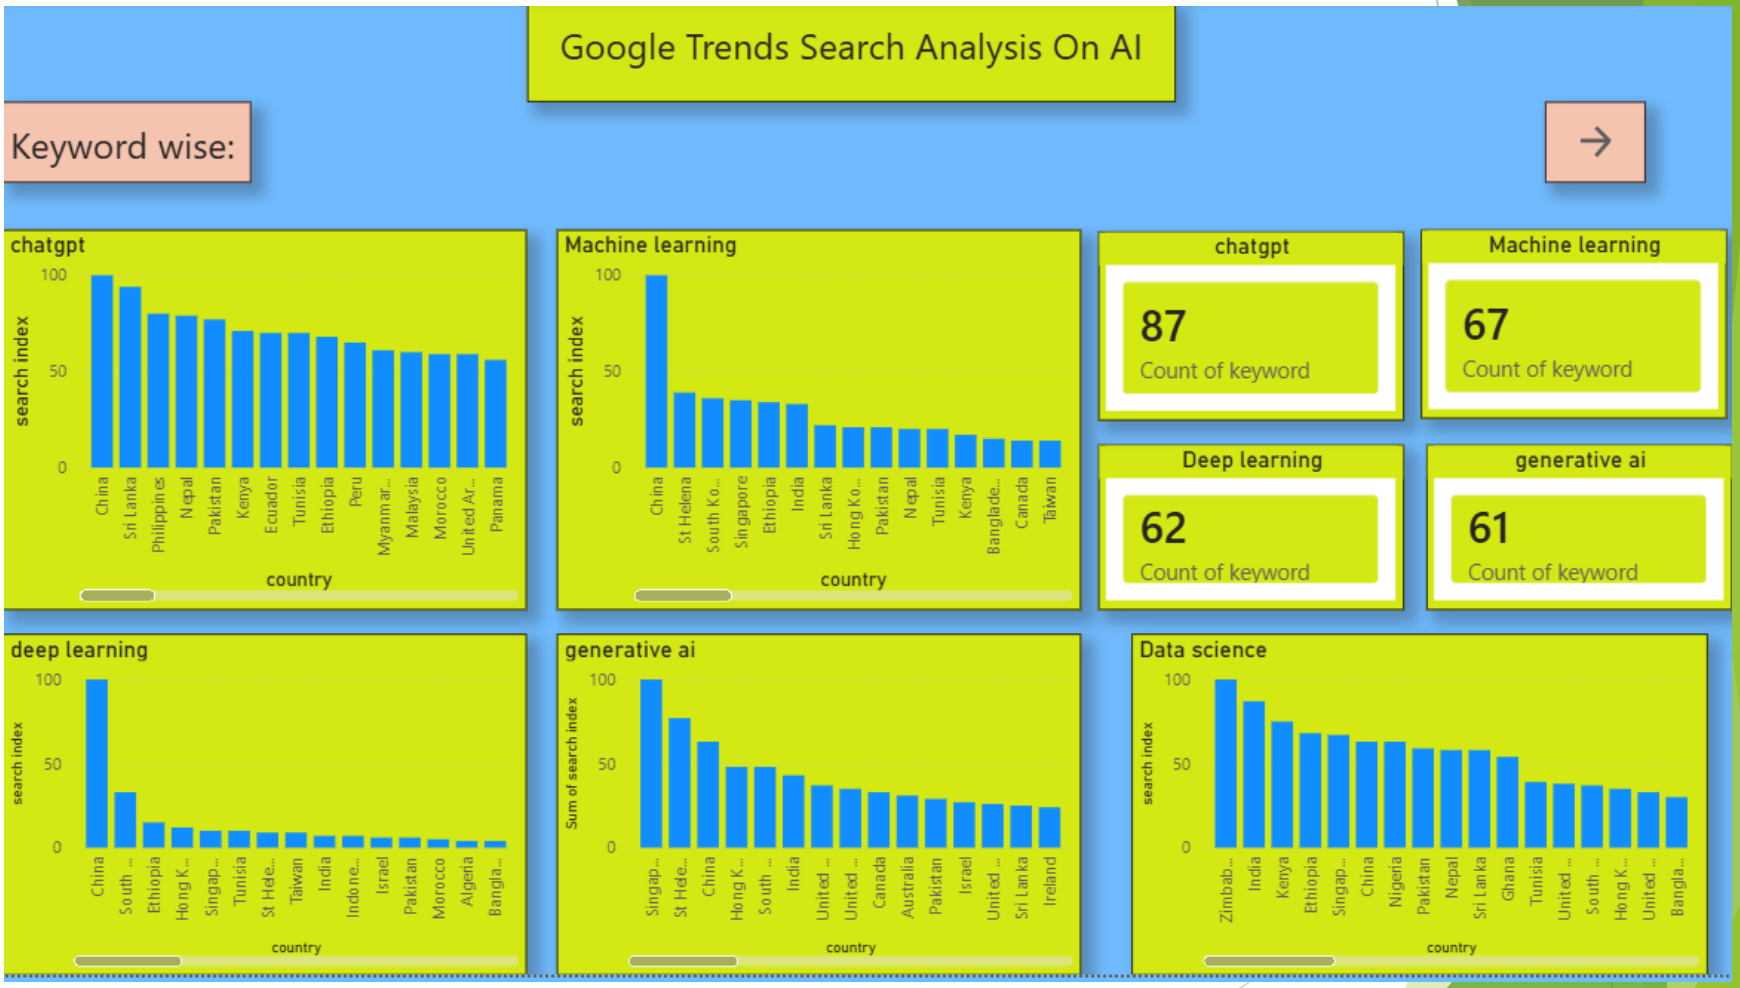
Objective of Analysis

- - Understand global interest in AI-related keywords
- - Compare search trends across countries
- - Identify dominant AI topics such as ChatGPT, ML, DL, and Generative AI

Keywords Analyzed

- - ChatGPT
- - Machine Learning (ML)
- - Deep Learning
- - Generative AI
- - Data Science

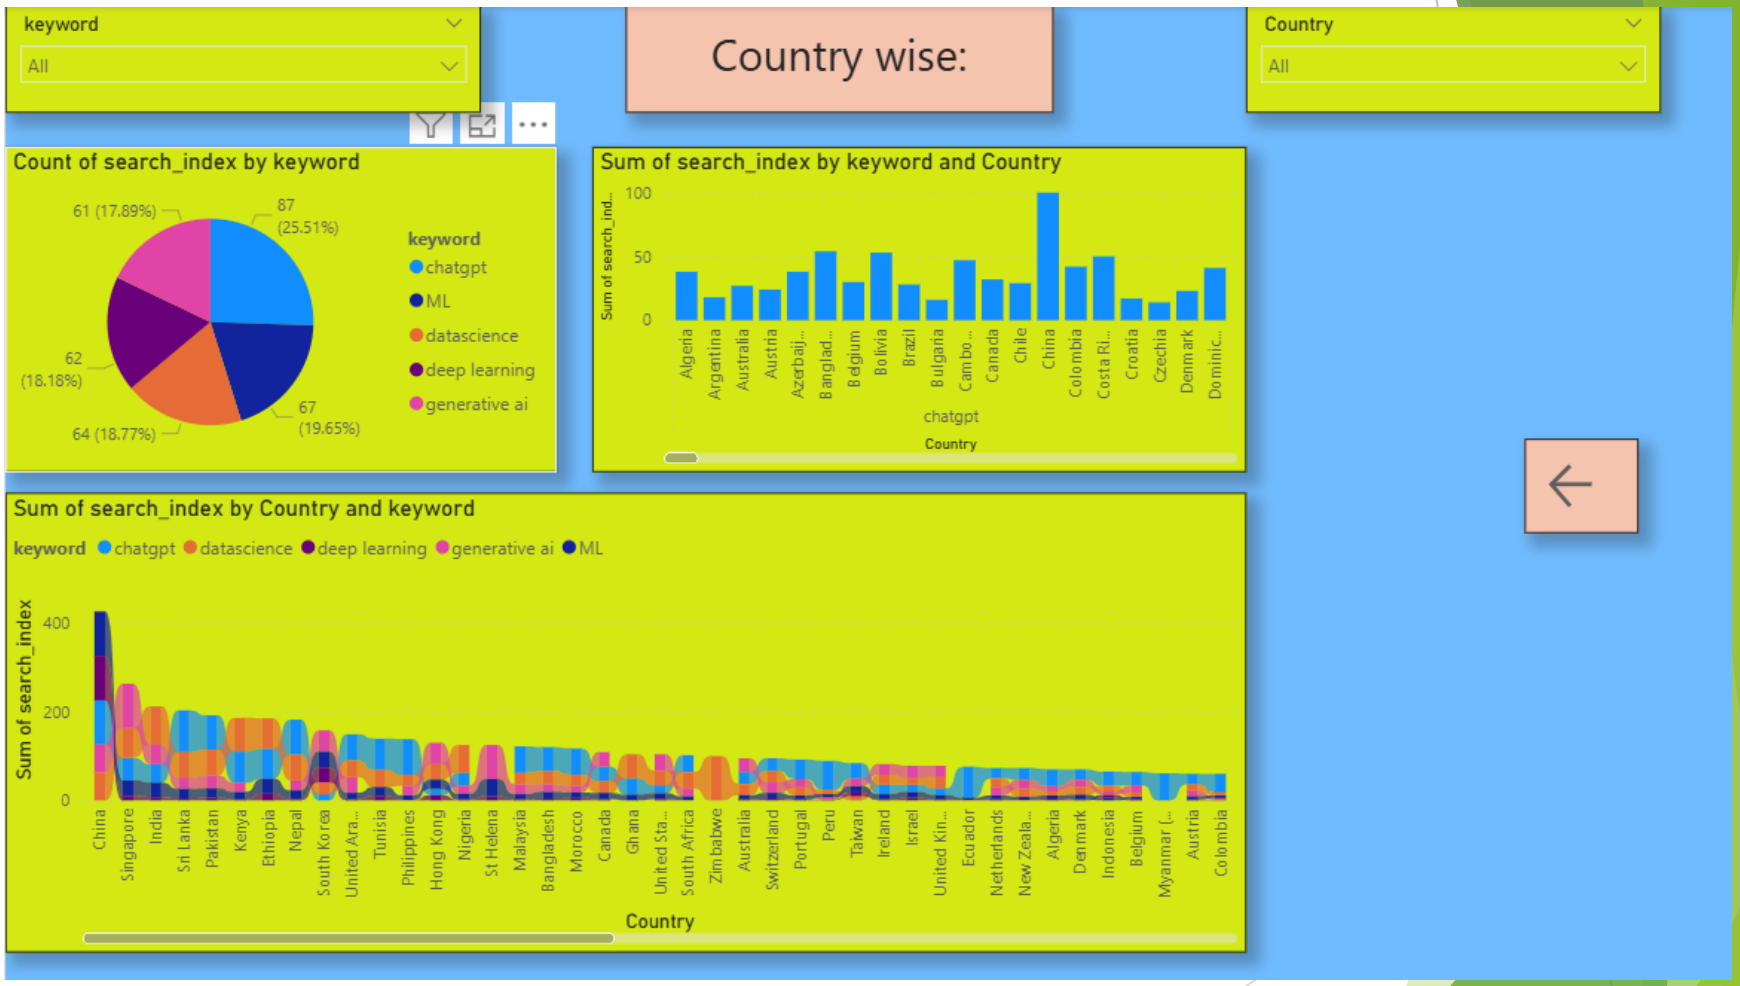
Keyword-wise Search Analysis



Key Insights (Keyword-wise)

- - ChatGPT has the highest overall search interest
- - Machine Learning and Data Science remain consistently popular
- - Generative AI shows rapid emerging interest
- - Deep Learning has niche but stable searches

Country-wise Search Analysis



Key Insights (Country-wise)

- - China, India, and Singapore show high AI search activity
- - Developed and developing countries both contribute significantly
- - ChatGPT dominates searches across most countries

Overall Observations

- - AI awareness is global and rapidly increasing
- - Practical tools like ChatGPT attract more attention than theoretical terms
- - Generative AI is becoming a major trend alongside ML and Data Science

Conclusion

- - Google Trends reveals strong global momentum in AI adoption
- - ChatGPT leads AI-related searches worldwide
- - Data can support decisions in education, research, and AI investments
